Additional donors needed to achieve blood quota

Photo by Jim Robertson An unidentified student gives one of 570 pints of blood which were donated during the first two days of the Blood Drive.

With 570 pints donated in the first two days, the Annual Red Cross Blood Drive at MIT is off to a great start, say chairmen Ernie

the rest of this week don't add up to an assured total greater than last's year's record of 1496 pints. The Thursday and Friday before Spring Vacation are thinly scheduled, and more donors for all days can be easily accommodated in the well-stated bloodmobile in the Sala de Puerto Rico of the Student Center.

Blood Drive has ever enjoyed.

Conference on social sciences emphasizes relation to technology

By Dave Kaye

A two-day conference on The Uses of the Social Sciences formally began Friday night at a dinner in the MIT Faculty Club with speeches by President-elect Howard W. Johnson, Dean Jerome B. Wiesner of the School of Science. and Max P. Millikan. Director of Center for International

The conference, sponsored by the Department of Political Science and the Center for International Studies, was primarily concerned with two topics: the relationship of technology to the social sciences and the relationship of government to social science.

Johnson Welcomes Delegates

President-elect Johnson, who welcomed the delegates, stressed the importance both of integrating approaches within the social sciences and of invoking the engineering and physical sciences to solve the problems of our

Atmosphere To Social Science ... Dr. Millikan regarded MIT's unique atmosphere as highly conducive to fruitful methodological developments in social science liberal arts college. As a result ternational Development, spoke on of MIT's proficiency in applied en-

gineering fields and the conviction that any problem will yield to a better answer after thoughtful scrutiny, social sciences "have gained a great deal from being at MIT." In particular, Dr. Millikan referred to "fruitful cooperation between natural and social scientists" in the disarmament problem and in the attempts to penetrate the Iron Curtain with

On the other hand, Dr. Millikan expressed distress at the relative failure to cooperate in dealing with the economic development pro-

Number One Challenge

Concluding the dinner's speeches, Dean Wiesner urged training in both natural and social sciences. He considered the number 1 challenge to be the problem of bringing up "a few generations of people in the natural sciences and in the social sciences who can speak the same language" and still have a firm inter-disciplinary background.

Saturday Lincheon

During the Saturday afternoon luncheon of the conference, David which would not be possible at a Bell, head of the Agency for In-

Before you fly the coop.

Leaving MIT for spring vacation? Look good off campus with handsome new casual clothing sporting the Tech insignia. It's a good look to take with you whether you're going home or to a resort.

Fleeced sweaters made from the no-care blend of rayon and acrylic fibers in a bronze shade are designed for comfort and freedom. They're new this season and available in sizes S to XL for \$5.49.

Another new insignia style is the maroon knit cotton short sleeved shirt with rugby neck banded in white. Great to wear with khakis and shorts, they're only \$2.95 in S-XL.

For the first time, the Tech insignia is shown on short sleeved Kodel shirts. Comfortable, washable Kodel is ideal for active men, and these finely styled shirts come in surf blue or charcoal shades for \$3.75 in S-XL. Attractive on women, too.

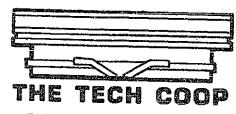

Then there's the traditional short sleeved T-Shirts with crew necks or rugby necks ranging in price from \$1.35 to \$2.95 for sizes S-XL.

Popular heavy long sleeve sweatshirts in blacks, mixed gray, maroon or white are \$2.50 to \$3.50 in sizes S-XL.

Newest this season are the outerwear styles of insignia clothing. Superbly styled velour zippered jackets in royal blue or maroon with white trim, these heavy jackets are washable and priced at just \$11.95 for sizes S-XL.

Perhaps the most practical insignia item of all is the water repellent, rugged nylon shell with detachable hood. Generous enough to go over the heaviest sweater, these zippered jackets in green, maroon or blue with white trim are ideal year round for boating, skiing, golfing, etc. \$7.95 in sizes S-XL.

Many of these items are available in junior and prep sizes too for children and young people.

Braniff International's new fare, for anyone twelve through twenty-one, virtually cuts the cost of flying in half.

At these prices, the fly-in may soon become as popular as all the other in things that are going on today. (We will permit guitarstrumming and folk-singing on route, but no noisy political debates, please.)

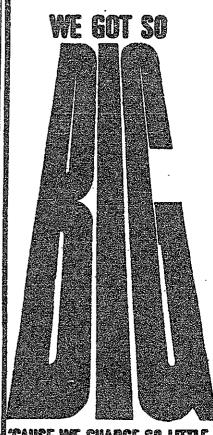

Eligibility requirements are simple. Just send us a \$3.00 registration fee. and we'll issue an identification card which, when validated, will entitle you to buy tickets at approximately half fare on our flights in the United States.

Of course, this will be subject to availability of space at departure time, and does not apply during certain holiday periods.

Soon, the same card will qualify you for discounts on hotels and other services.

Make your application in person at any Braniff office.

Or mail the coupon below.

success? What price

The MIT student can rely upon the future. Eminently above the draft, provided for in all his worldly needs, and to some extent insured against financial disaster by the generous scholarship program of the Institute, he can sit back and contemplate a future as secure and profitable as that of any man in the world. An extremely valuable technical education is being handed him for an initial investment of \$1900 a year and a reasonable amount of scholarly perseverance.

This is as it should be. The MIT student earns the privilege of induction into the scientific elite because he has shown outstanding aptitude for science and mathematics in high school, along with a certain minimum achievement in his other subjects. He can be rightfully proud of his intelligence. Heredity and social environment grant the gift of brilliance to very few.

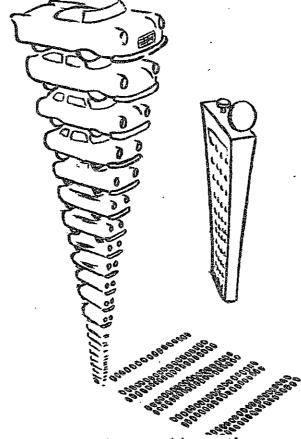

But if he is proud of nothing else, as some of us are, he is overlooking a fundamental fact of existence. Intellect alone does not make a man. If he rejects with tragic pride the multitude of opportunities that the Institute offers toward making him a whole man—the athletic teams, the social life, the million and one activities-he is making a mistake that is not only costing the country a well-rounded citizen but costing himself a happy and fulfilling life.

The fact is that if he comes to the Institute with no ability to enjoy life or relate to other people, he will not emerge with these abilities four years later. The traditional policy, based on the assumption that maturity automatically accompanies brilliance, has been to leave the student to his own life. This policy of freedom is fine for those who know how to make good use of it; but a hermit will use his freedom to shun his fellow students and the influences that can draw him out of his self-imposed isolation. What was in high school a pleasant ivory tower becomes a dismal tomb by the time his four years are up. In high school, he found that he could dismiss the frustratingly intricate human race by burying himself in the delightful simplicities of mathematics; little did he realize then that his willful isolation would leave him barren as a creator, ineffective as a leader, and bland as a person. When this recognition does get through to him, his only defence is an unrealistic egotism that leads him to further reject all humanizing influences.

Yes, these people can rely upon society's tremendous demand for washing machines and atomic missiles to catapult

them into the upper middle class. We do not see these people; the Institute psychologists do not see them; they live behind closed doors in a kind of vaguely satisfying solitude, grinding away at friends, because they can't, their friends friends, because they cant'; their friends don't drop in to talk to them, because they are not interesting to talk to; and they do not talk in class, because their teachers won't make them. Even though their growing up is in their own hands, nobody will take the time to impress upon them that there is yet time for them to save themselves.

How valuable is a socially bankrupt scientist?

The parking problem—if we could only stack them higher

. Bv Mike Ródburg

35. Samuel S. Bowles, an instructor of economics at Han vard, was dismissed from his position for refusing to sign # Massachusetts Teachers' Loyalty Oath. In taking legal action that he be reinstated, Bowles claimed that the Corporation (Harvard's) should have postponed its decision until Prof. Joseph Pedlosky's suit had been heard.

Prof. Pedlosky, Associate Professor of Mathematics here has challenged the constitutionality of the oath; the suit is pend ing in the Supreme Judicial Court of Massachusetts.

36. As president-elect Howard Johnson prepares to assume his new rol, the Sloan School of Industrial Management has need of a new dean. We can expect an announcement as to the man so named very shortly, perhaps before vacation.

Some imaginative bidding by South steered his partne rinto slam, and careful declarer play assured the contract.

Opening lead: 48.

The first round of bidding re quires little or no explanation except that West's double wa based mainly on distribution at East's free response of one hear was slightly shaded. South bid the heart suit to show the great strength of his hand; We countered by raising hearts in attempt to reduce the opponent bidding space. North supports South's clubs, and South was # sented with the problem of trying to find out whether or not to be slam. He chose to bid four heart so that the repeated cut bid woll emphasize complete control of in lest heart suit with a powerful had ible and ask North for controls in the two side suits.

> West's double of four heart was primarily lead-directing t case partner would be on less against a diamond contract. Will West didn't believe a heart less show his lack of interest in a

West found enough clues from the bidding to enable him to hit upon the best opening lead - a

aid in a dummy reversal. A spade lead was too likely to find either on

trump. East's failure to make a lead directing double of five diamonds or six clubs (Lightner asks for lead of dummy's first bid side suit) ruled out a diamond lead. Declarer clearly had a heart

a short suit in dummy or to aid declarer in picking up the suit.

Further, a trump lead should cut South won the trump lead on the board and led a spade. East ducked. While it appears at a glance that East should rise with the spade ace to return a trump. declarer can easily make the con-

tract against such defense. Also, East wants to duck the trick if declarer holds king-queen or kingjack. If declarer plays the king at this point, he can make the contract with an overtrick by ruffing out his spades. However, a better play for the contract is to

play the spade ten. Consequently, South can make, his contract if East holds queen-jack, if West has no more trump (as is likely),

or if East holds the spade ace (because it can be ruffed out to establish the king). West wins with the jack_and

returns the heart king. South ruffs in his hand, then ruffs a spade and another heart back to his hand. He continues with another spade ruff, dropping the ace, and

a diamond to the king. Declarer

next pulls trump and cashes the spade king and the remaining diamonds for twelve tricks.

efforts, they won second place The quality of the performances in the "light singing" division, ATO, Senior House, and ZBT

put in the finest performances of the evening. ATO won first in the "light singing" category with an amusing barbershop quartet ZBT, attempting to win the All Tech Sing trophy for its third straight year, gave a fine performance with three pop-folk songs. Surprisingly their intentions were thwarted when Senior House combined quality with hilarity in an outstanding performance. ZBT was awarded first place in the serious division, Senior House's entries included a mock folk song, 'In the Grimy Cambridge Air,' and a modern rendition of the 'Hallelujah Chorus,' the 'Howard Johnson Chorus.

As always in the Tech Sing, one of the highlights of the evening was the master of ceremonies, Dean Frederick Fassett. In addition, the performance of the Wellesley Widows as a fill-in for the time between the judges' decisions and award presentations made the evening a most enjoyable one.

Dramashop one-acts boring and funny

By David Koffman

Drama.

The MIT Dramashop presented the last in this year's series of oneact plays, Friday and Saturday.

The first offering, Samuel Becket's 'Play,' was well done in the sense that it fulfilled the author's intention of presenting ultimate boredom. Unfortunately, the audience itself was bored in the process. Actually, Beckett intended the play to be even more boring than director Robert Moore felt he could present it. Outwardly the story of a three-cornered love atfair as told by the participants, 'Play,' as implied by the generality of its title, pretends to show the lives of all of us. The staging has three disembodied faces who speak their interrupted monologues in response to a single spotlight that moves among them. The monologues go on independently; the three characters obviously never communcated, despite their apparently close relationship.

Not only does this result in boredom, but it has no real end, as shown by the remarkably unsubtle device of repeating the entire play. But if the viewer can maintain his interest, he may thank Beckett for the second chance to figure out just what is going on. The cast, Patricia Saunders, Eric Goldner '68, and Linda Sharpe '69 and director Robert Moore, are to be congratulated.

Paradocks

In 'A Resounding Tinkle' by N. F. Simpson, director James Woods '69, succeeded admirably in his declared purpose of playing the material for laughs. An absurd comedy, parodying middle class life, 'A Resounding Tinkle' contains, even on the surface, a great deal of symbolism, From the title to the character's names (Bro and Middie Paradock, played by Martin Donovan '69 and Eileen Koch), 'Tinkle' is one long contradiction in terms.

The play's humor has become its most obvious characteristic by the time "Uncle Ted" shows up. Played by Wilma Sandler '67, Uncle Ted has implied characteristics. Beyond such brickbat devices, every line of dialogue seems to contain some similar absurdity. Who can help but langh as Bro and Middie argue over compuicated

General Electric is an easy place to work.

All you need is brains, imagination, drive and a fairly rugged constitution.

Oh, yes. Something else that will help you at G.E. is an understanding of the kind of world we live in,

and the kind of world we will live in. There's a lot happening: The population is continuing to explode. The strain on resources is becoming alarming. At a time when men are being lured by the mysteries of space, we're faced with the task of making life on earth more livable.

There's a lot happening at G.E., too, as our people work in a hundred different areas to help solve the problems of a growing world: Supplying more (and cheaper) electricity with nuclear reactors. Controlling smog in our cities and pollution in our streams. Providing better street lighting and faster transportation.

This is the most important work in the world today: Helping to shape the world of tomorrow. Do you want to help? Come to General Electric, where the young men are important men.

Lacrosse team bows to Brown

By Neal Gilman

In their first scrimmage, the MIT varsity lacrosse team faced Brown Saturday. The Ivy League power proved to be too much for 10-3 setback.

Brown scored seven goals in a row before MIT could break into the scoring column. Steve Schroeder '67° scored twice, while Greg Wheeler '67 scored once. Although Brown was a superior team, most of their goals were scored from the defense's inexperience in coping with Brown's offense. During the engineers practices, they worked their offense with three men in the midfield, one man in the drease, and two men behind the crease. Brown, however, played with no one in the crease, but with a large circle of six men surrounding the crease. They scored by having the midfielders cut into the circle over the

Tech nine wins, 7-3; downs Bridgewater in pre-season action

By Tom James

In their pre-season opener the MIT varsity nine saw action against Bridgewater State. Coach John Barry switched players around often, as the Tech nine emerged victorious, 7-3.

Scoring three runs in as many innings, the Techmen got off to an early lead. Rick Papenhausen '67 got on with a single, advanced to third, and scored on another single by Mike Ryba '67. In the third. Eric Jensen '67 got his first RBI of the year as he sacrificed Jeff Altman '67 from third on a high fly to deep center. The weather grew cold as the afternoon progressed; but even so, our big inning was the seventh.

Papenhausen led off with a walk and advanced to third on Ryba's single. He then made it home on a double steal. The big hit of the day came two hitters later when catcher Tom Hood '68 smashed a long triple with one on to finish out the scoring.

Coach Barry went with three pitchers, leading off with Papenhausen. After three innings of consistent hurling, Papenhausen moved to left field, and Bob Kiburz '68 took over. In the next three rounds, Kiburz showed fair control, trying to keep his curve down low. Ed Richmond '67 got two men out in the seventh, but then he was hit hard.

Overall play wasn't too bad in
